The Health Department divides food service code violations into two categories; Critical and Non-Critical Violations.

**Critical Violations** are more likely than other violations to contribute to food contamination, or illness and/or injury.

**Non-Critical Violations** although important to the overall hygiene of the establishment, do not necessarily present an immediate threat to food contamination or illness and/or injury.

A report for each establishment that is inspected shows the number of critical violations, along with a short statement as to the nature of the violations. The report also shows the number of non-critical violations but doesn't list the nature of those violations.

**\*Corrected on spot**

**May 1, 2007 through May 31, 2007**
